

Every time the shutter clicks, it becomes a part of creation.

To make it easier for everyone to collaborate on complex image overlay and mosaic projects, we've launched the all-new "Shoot Together" feature. Here, you can initiate a vision and wait for like-minded partners to join, or claim a task and use your lens to add your unique touch to a collective masterpiece. Let's transcend space and capture beautiful moments together.

☒ How to join in? Please read the tutorial below:

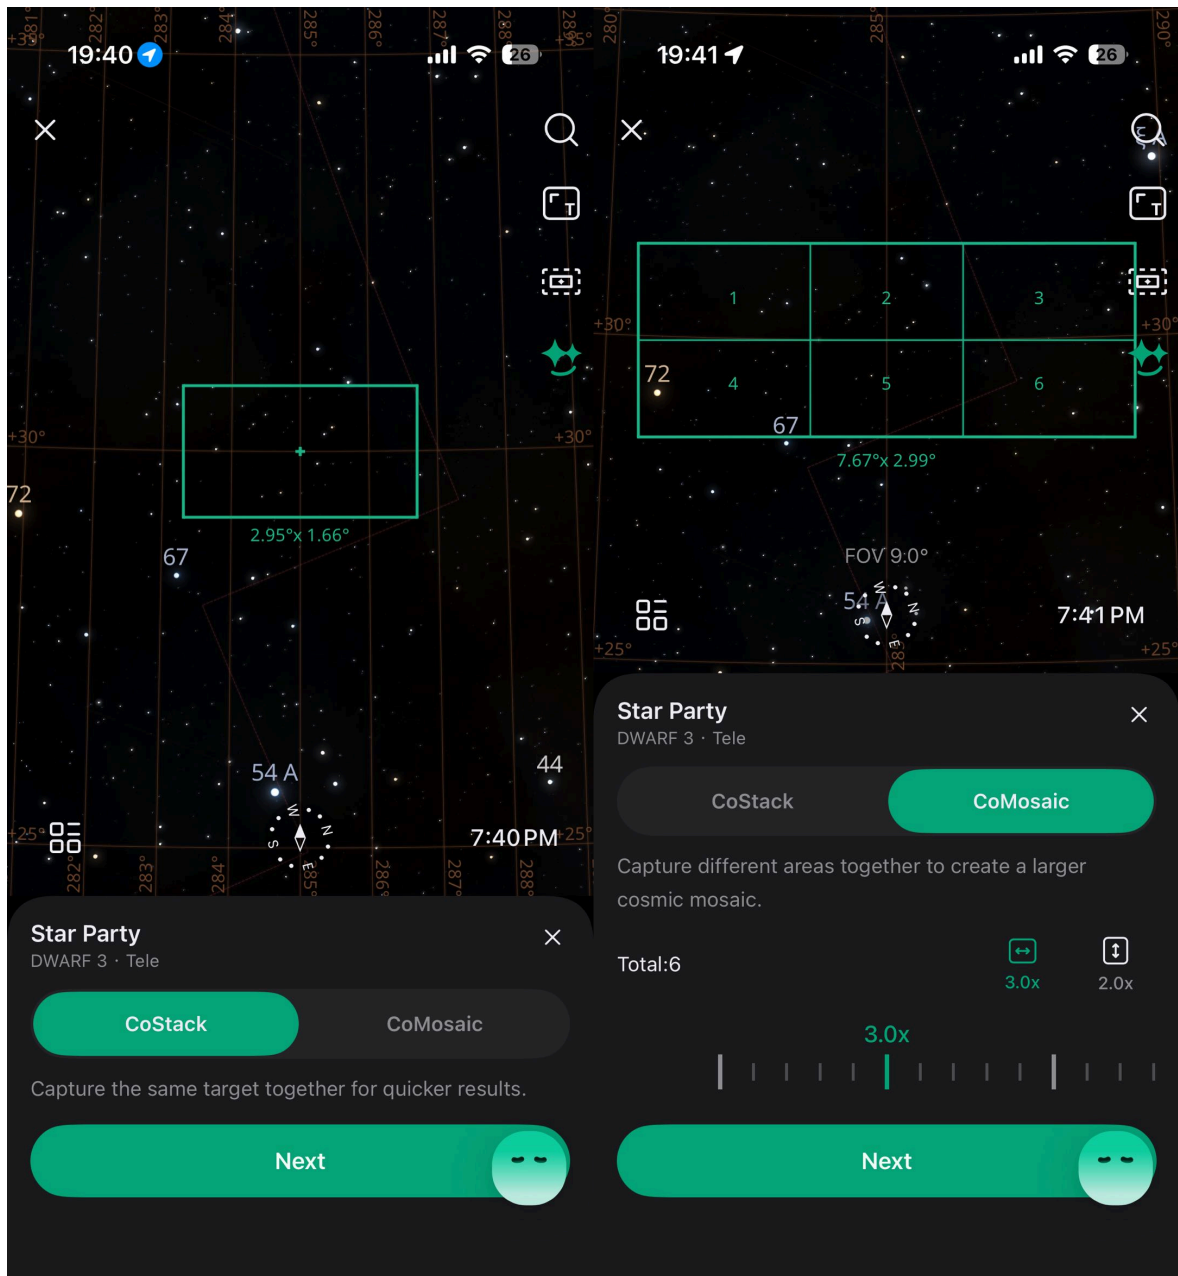

1. Initiate Collaborative Shooting

Click the "Star a Star Party" button to start the multi-user collaborative shooting process.

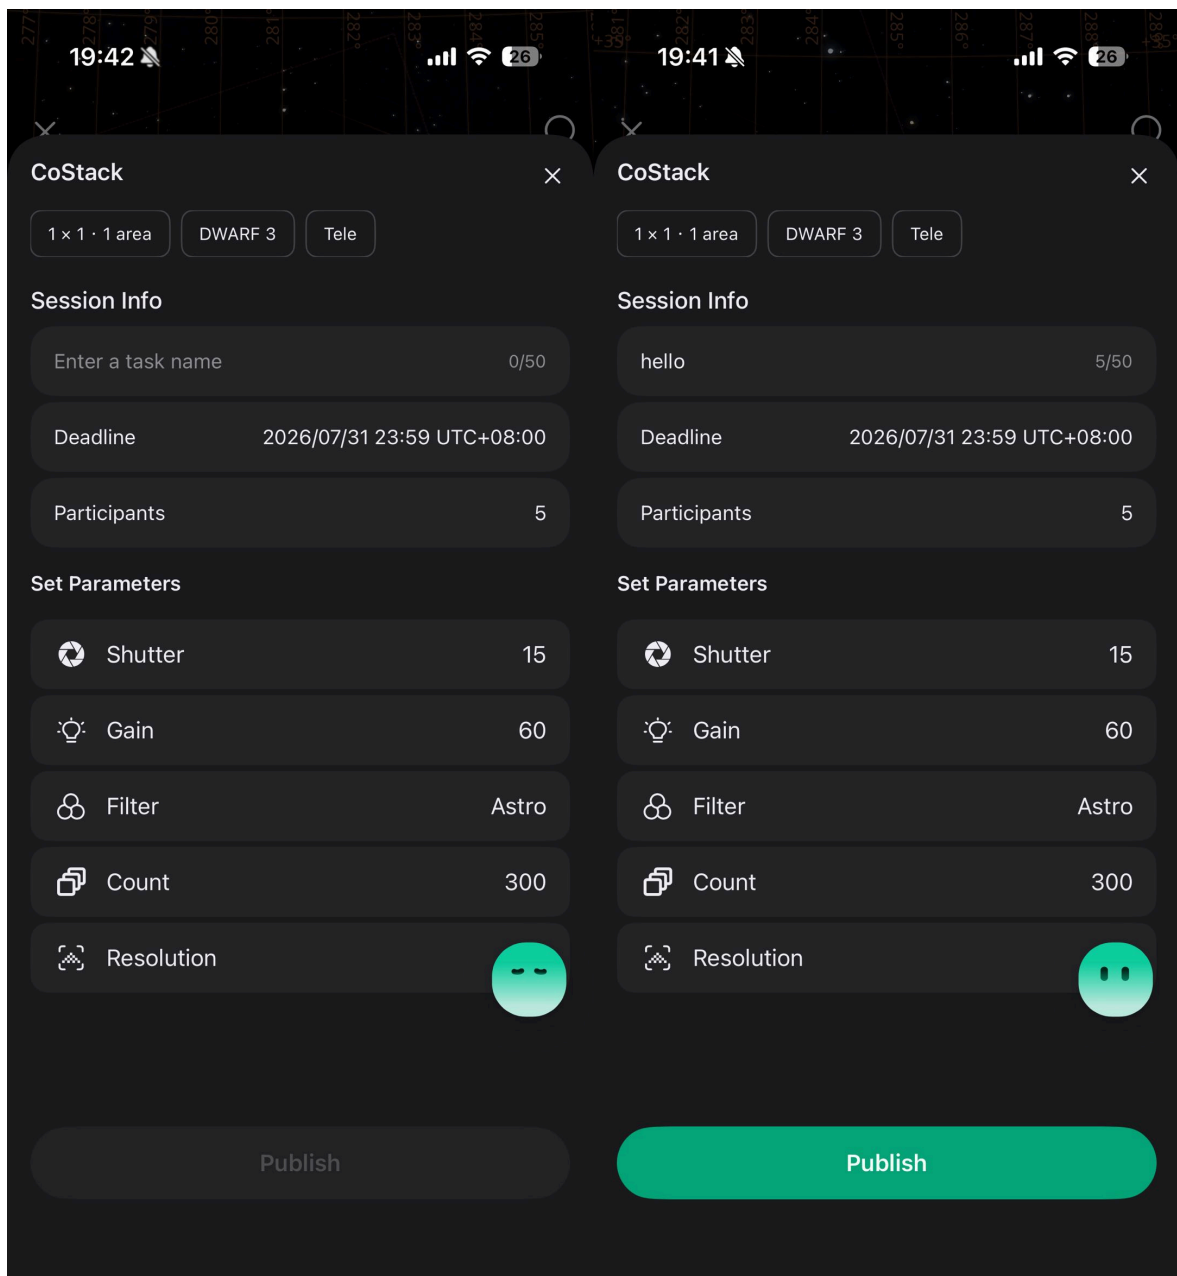

2. Select Creation Mode

Supports two collaboration forms: Image Overlay or Mosaic. Choose as needed. If "CoMosaic" is selected, you can customize the dimensions of the mosaic.

3. Fill in Task Information

Complete the basic information and adjust shooting parameters according to the shooting plan requirements to ensure the task information is complete and accurate.

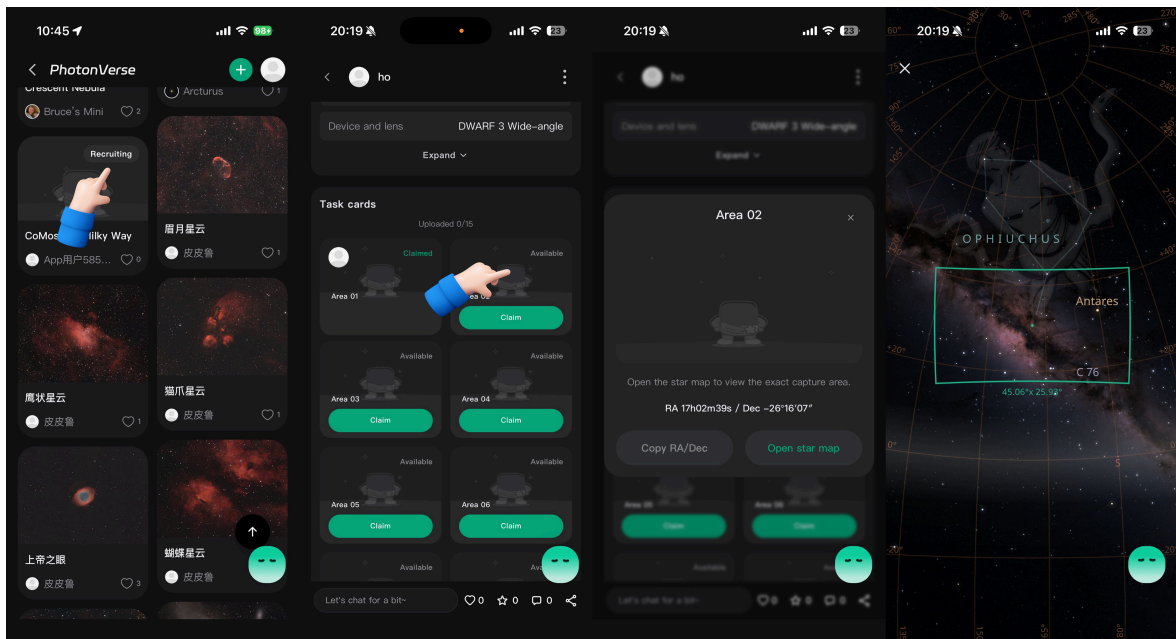

4. Manage Initiated Plans

- View Plan: Go to the homepage list to browse the details of created "Shoot Together" plans;
- Delete Plan: For plans that do not need to be kept, click the "Delete" button to clear them.

5. Participate in Others' Plans

Find plans initiated by other users; click on a task card to view details such as location coordinates. After determining if you are a match, click "Claim" to accept the task.

6. Abandon Claimed Tasks

If you cannot complete a claimed task for any reason, find the corresponding plan on the homepage and click "Abandon" to release the task slot, making it easier for other users to accept it.
